Multi

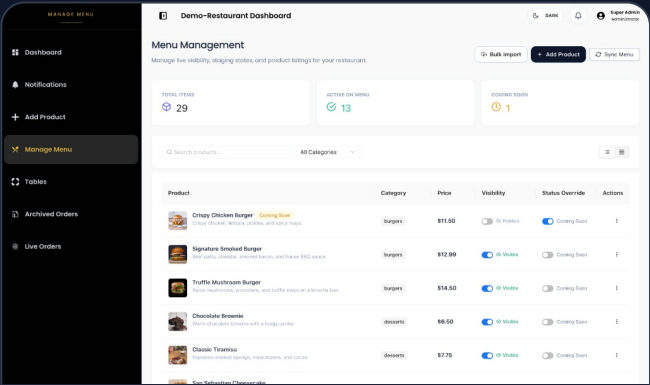

TENANT & BRANCH READY

Executive Summary for Business Growth

Designed specifically for restaurants, cafes, and multi-branch dining groups, this all-in-one SaaS platform transforms traditional table service into a lightning-fast, highly profitable digital operation. From automated QR code generation and instant cart customization to AI-driven upselling and live kitchen analytics, the platform maximizes table turnover, reduces staff overhead, and elevates customer satisfaction.

1. Advanced Menu & Catalog Management

Complete control over product visibility, pricing, categories, and bulk onboarding.

Menu Management Dashboard

Powerful admin tool to manage live visibility, pricing, and stock status.

Bulk Menu & Product Upload

- Upload full menus in bulk with multiple item images instantly.
- Manage product availability, pricing, and category filters seamlessly.
- Instant sync across web and mobile ordering interfaces.

Visibility & Status Overrides

- Toggle items between **Visible**, **Hidden**, or **Coming Soon** states.
- Real-time inventory control to prevent ordering unavailable dishes.

Category & Search Filtering

- Organize items into Burgers, Pizza, Drinks, and Desserts.
- Instant search bar for lightning-fast customer navigation.

2. QR Table Management & ZIP Exports

Streamline dine-in operations with dynamic QR codes, occupancy tracking, and bulk deployment.

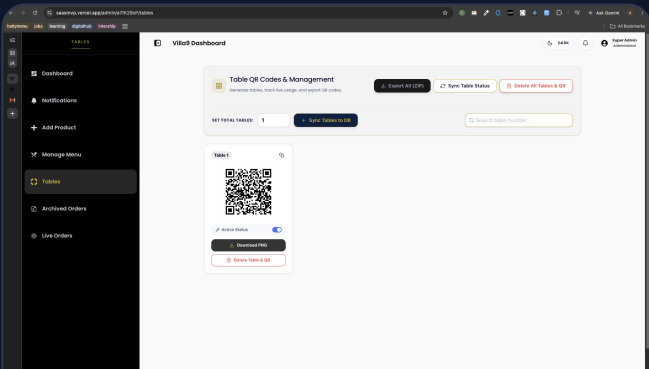

Table QR Management & Bulk Operations

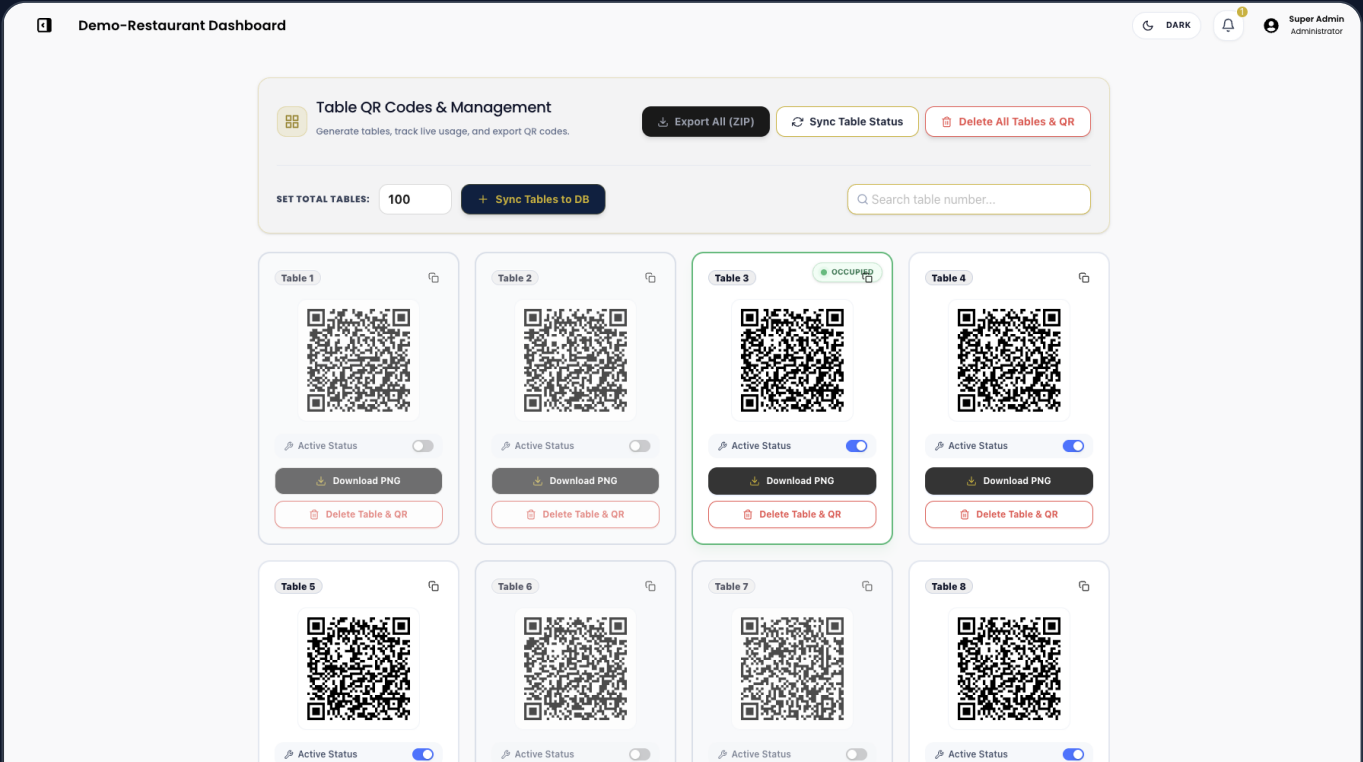

Generate, track live usage, and export ZIP packages of table QR codes instantly.

Dynamic QR Code Generation

- Generate unique restaurant-specific and table-specific QR links.
- Download individual table QR codes as high-res PNG files for printing.
- Copy direct URLs for digital sharing and social promotions.

Bulk Table Operations & ZIP Export

- Set total tables instantly and sync to database with a single click.
- Export all table QR codes into a structured ZIP file for physical deployment.
- Live status indicators showing Active, Occupied, or Available tables.

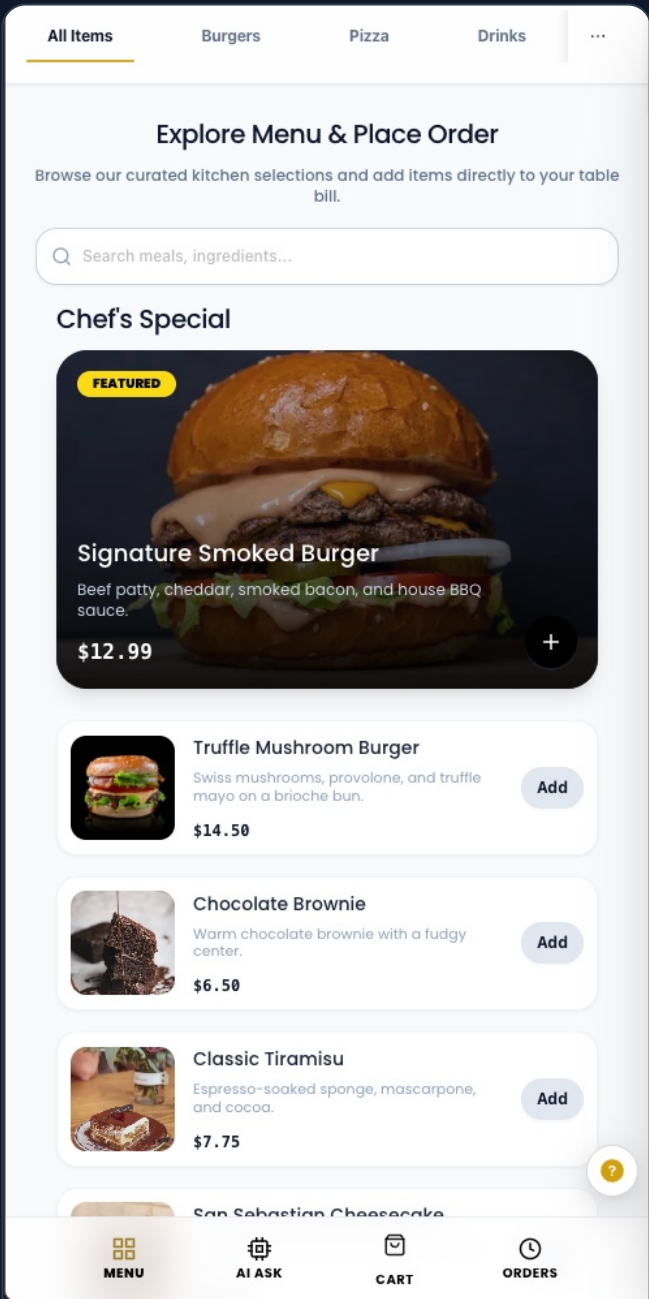

Multi-Table Management & Occupancy Grid

Visual table cards showing active occupancy status, quick PNG downloads, and bulk operations.

3. Frictionless Customer Ordering Experience

Modern mobile web interface designed for high conversion, customization, and AI assistance.

Customer Digital Ordering Interface

Sleek mobile menu browsing with categories, search, and instant cart additions.

QR Table Scanning & Context

- Customers scan table QR code to open dedicated restaurant context.
- No app download required — instant web app access.

Cart & Special Order Notes

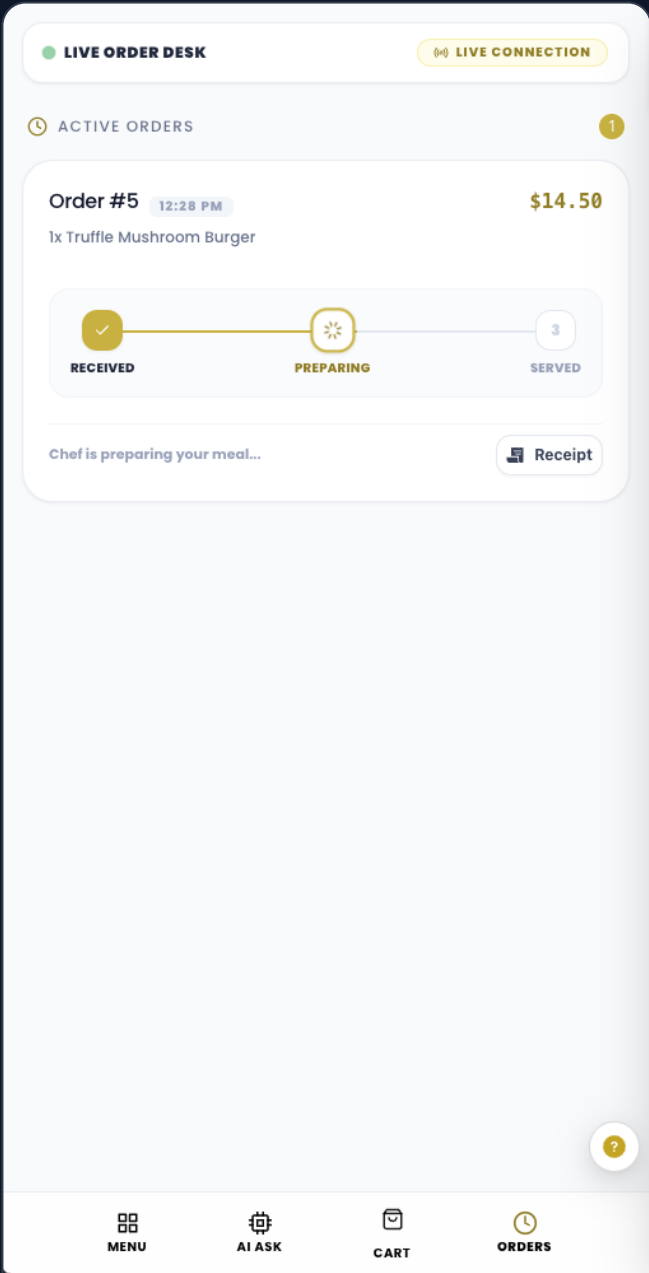

- Add/remove items with precise quantity controls.
- Include custom notes (e.g., "no onions", "extra sauce") for kitchen staff.

Geolocation & AI Chat Assistant

- Optional geolocation verification for delivery and distance-aware orders.
- Built-in AI chat assistant to answer menu questions and drive upselling.

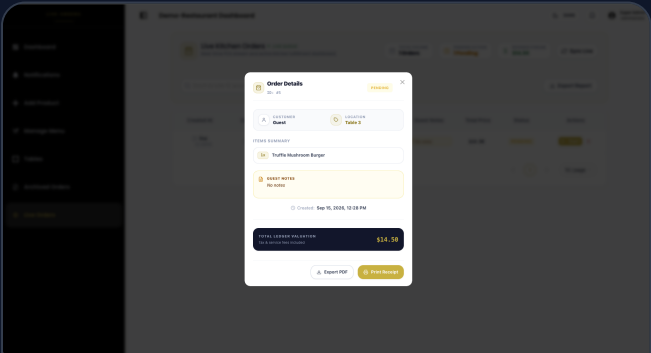

4. Live Order Tracking & PDF Receipts

Complete transparency for diners with real-time status progression and instant receipt generation.

Real-Time Customer Order Tracking

Transparent progress tracker from Received to Preparing and Served for a modern guest experience.

Order Details & PDF Receipt Generation

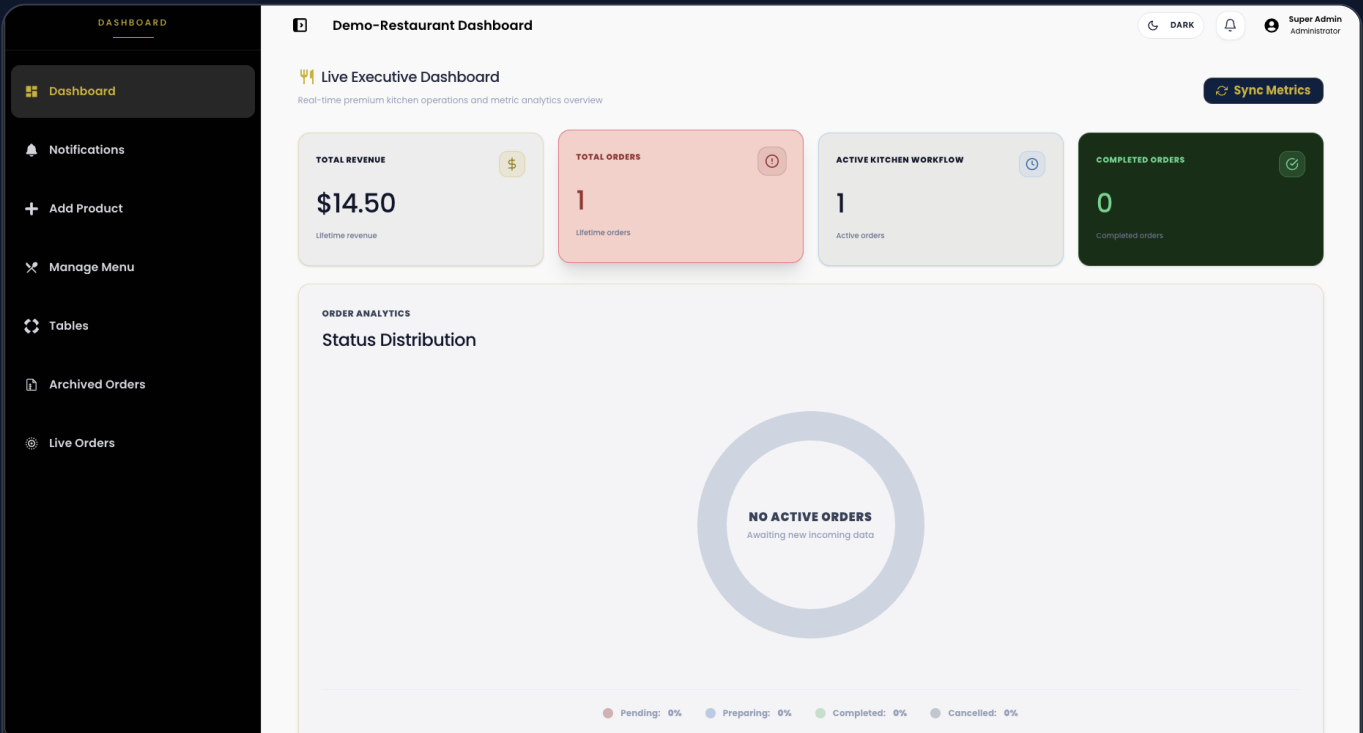

Detailed order breakdown with guest notes, total ledger valuation, and direct PDF/receipt printing.

Why Customers & Owners Love This Workflow

Diners experience complete peace of mind with live visual progress bars (Received → Preparing → Served). Administrators and staff can instantly inspect order ledgers, review guest notes, compute tax and service fees, and export professional PDF receipts or reports directly from the UI.

5. Executive Analytics & Business Value

Real-time financial visibility, status distribution analytics, and scalable multi-branch management.

Live Executive Analytics Dashboard

Real-time revenue metrics, active workflow tracking, and status-distribution visual analytics.

BUSINESS FEATURE MODULE	OPERATIONAL IMPACT & VALUE	STATUS
Multi-Restaurant / Slug Routing	Manage multiple branches or separate restaurant brands from one unified SaaS dashboard.	✓ Active
